EDUCATION

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE & ENGINEERING

OMDAYAL GROUP OF INSTITUTIONS

10/2021 - 06/2025

Howrah-711316, West Bengal

Relevant Coursework

- Python Development
- Software Engineering
- Database Management Systems

HIGHER SECONDARY EDUCATION

BNR EXCELLENCE ACADEMY

06/2019 - 04/2021

Kharagpur-721301, West Bengal

WORK EXPERIENCE

Software Developer

RS Consultancy

04/2025 - Present

FULL-TIME • ON-SITE

Key Achievements

- Developing a **Windows-based desktop application** to streamline internal and client workflows
- Implemented **MQTT-based communication** enabling real-time data exchange across multiple client systems
- Designed and maintained** web interfaces to support application workflows and improve usability
- Identified and resolved performance issues through **testing** and **debugging**, improving application reliability

Python Developer Intern

Winstreet Infotech

10/2024 - 04/2025

INTERNSHIP • REMOTE

Key Achievements

- Developed and maintained a **Python-based e-commerce website**, improving system stability and performance
- Collaborated with clients** to gather requirements and translate business needs into functional features with consistent on-time delivery
- Conducted **testing** and **debugging** across modules, reducing post-release defects and improving production stability
- Assisted in **code reviews** and **documentation**, contributing to improved code quality and maintainability

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript

Backend: FastAPI, Django, REST APIs

Frontend: React.js, Next.js, Tailwind CSS

Databases: MongoDB, PostgreSQL, MySQL

AI/LLM: Gemini API, Hugging Face, Dialogflow ES

Tools & DevOps: Git, GitHub, Postman, Vercel, Render

PERSONAL PROJECTS

DevTrackr – Developer Analytics SaaS

- <https://devtrackrr.vercel.app>
- Built an AI-powered GitHub analytics platform with real-time repository synchronization and interactive dashboards
- Integrated Gemini API with FastAPI and React to generate automated insights on developer activity and productivity

Lysn – PDF to Audio App

- <https://lysn.vercel.app>
- Developed a web application to convert PDF documents into audio using gTTS and PyPDF2
- Implemented secure authentication (OTP, Google OAuth) and scalable file storage using MongoDB GridFS

NexGenie – Chatbot for LMS

- <https://nexgenie.vercel.app>
- Built an AI-powered chatbot for learning platforms with personalized recommendations and real-time assistance
- Developed a scalable backend using FastAPI and Redis, integrating Dialogflow ES and Gemini API

MausamVibe – Weather App

- <https://mausamvibe.onrender.com>
- Developed a Django-based weather application providing real-time, location-based forecasts using OpenWeatherMap API
- Improved frontend responsiveness and optimized backend data handling for better performance
